Scoliosis Support Groups
for girls by girls

About CG

At just 13 years old, Leah Stoltz founded Curvy Girls in Long Island, NY as a way of connecting with others who knew and understood the challenges of bracing, spinal surgery, and the various other issues related to a scoliosis diagnosis.

Curvy Girls went global after Leah was featured on Nickelodeon's HALO (Helping And Leading Others) Awards, recognizing teens for making a difference in their communities while overcoming adversity.

Now, girls around the world are following Leah's example by connecting with one another in friendship and support through the CG network.

Peer Support Groups

Curvy Girls provides community for girls who have been diagnosed with scoliosis. Monthly meetings are hosted locally across the country and internationally. Discussions are led by CG teen leaders in a safe and supportive environment.

Scoliosis Support Groups

What is Scoliosis?

Scoliosis is the lateral bending and curving of the spine that when progressed is treated with bracing, scoliosis-specific exercises, and at times, surgery.

What is CURVY GIRLS?

Curvy Girls is a peer-run network of support empowering pre-teen and teen girls to become leaders, make healthy lifestyle choices, and improve self-esteem by diminishing the emotional impact of scoliosis. We seek to help girls find their voice through support and acceptance.

Her brace
Went on
Her heart
It sank
Inside
Her
Plastic
Shell
Silently
She
Recoiled
In
Self
Despair
Her
World
Consumed
With
Worry
Overcome
With useless
Shame
A voice
Quieted
By a Secret
Blame
A Spirit
Lost And
Then
Reclaimed
She shouts
You will
Not
Silence
Me!
