

COLUMBIA UNIVERSITY
Department of Orthopedic Surgery

PRISM Fellowship

Pre-Medical Research and Immersion in Science and Medicine
Fellowship in Pediatric Orthopedics

About Us

The Pre-Medical Research and Immersion in Science and Medicine (PRISM) Fellowship at Columbia University Department of Orthopedic Surgery is a prestigious one-year program designed for pre-medical college graduates seeking hands-on experience in clinical practice and medical research. Fellows work alongside world-renowned orthopedic surgeons, contribute to groundbreaking research, and gain invaluable mentorship to prepare for medical school and beyond.

Fellowship Offerings:

Mentorship

Learn from leading experts in the field and gain firsthand experience in the world of pediatric orthopedics.

Clinical Experience

Scribe during patient visits, learn from experienced physicians, and gain practical medical knowledge.

Research

Contribute to cutting-edge research projects, from subject recruitment to data analysis.

Education

Attend lectures and conferences, and benefit from mentorship from renowned faculty.

Career Advancement

Receive guidance and form connections for medical school and beyond.

Financial Support

Fellows will receive a weekly stipend over the course of the year.
